

1. b) The bar graph represents the data better because it actually shows the numbers on the chart because the circle graph only shows what color it is and not the percentage so then that is one reason why the Bar graph shows the better data. Another reason why is that the bar graph has Titles and names on them and the bar graph is a lot easier to read than the Circle Graph.

2. a) The trend shows the value of 1 U.S Dollar bill to a Canadian dollar bill and it shows how much it raises each year.

b) I'm predicting that in 2002 it will be 1.585 because in 1997 the value in Canadian dollar bills was 1.385 and then in 2000 It was 100 more so that means if it is 2 years before than
